- VishwaMart Software Engineer | Apr 2006 Apr 2008 | India

Roles & Responsibilities

- Designed and integrated third-party web services within enterprise technical landscapes.
- Provided infrastructure sizing recommendations and optimized resource allocation.
- Led the technical inception phase of projects, defining architecture and solution design.
- Analyzed complex architectures to identify root causes and delivered end-to-end resolutions.
- Debugged backend workflows across multiple microservices to improve functionality.
- Resolved production incidents and escalations, ensuring minimal downtime and service continuity.
- Conducted feature testing after each sprint, providing actionable feedback for product enhancements.
- Collaborated with developers, architects, and product managers to address defects and propose improvements.
- Delivered workarounds for critical production outages, ensuring immediate business impact mitigation.
- Identified and implemented performance optimizations across services to enhance efficiency.
- Configured metrics and monitoring in GCP, including CPU/memory utilization and exception tracking.
- Managed deployments, release activities, and ensured smooth transition of deliverables.
- Enhanced project documentation, created knowledge-sharing resources, and trained junior team members.

Education

- Master of Computer Applications (MCA) Uttar Pradesh Technical University, Lucknow, 2006
- Bachelor of Computer Applications (BCA) MCRP University, Bhopal, 2003

Certifications

- Backbase Certified Back-End Developer Backbase Academy (2017)
- Core and Advanced Java K.I.E.T. (2005)

Languages

- English C2 (Proficient)
- Hindi C2 (Proficient)
- German A1 (Beginner)
